DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of claims 1-6 and 9-23 in Paper No. 0504 (received May 7th, 2004) is acknowledged. However, due to the establishment of allowable subject matter in the independent claims as outlined below, claims 7 and 24-31 are hereby rejoined and allowed with claims 1-6 and 9-23.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

The drawings received on September 22, 2003 are acceptable.

Allowable Subject Matter

Claims 1-31 are allowed.

The following is an examiner's statement of reasons for allowance. The prior art of record and to the examiner's knowledge does not teach or render obvious, at least to the skilled artisan, the instant invention regarding a method of attaching bump balls (also "solder balls" or "metal balls") to a semiconductor chip wherein an adhesive layer (also "sticky film" or "solder layer") is layered over each die pad of the chip's active

surface side, scattering the balls on the active surface side of the chip and then vibrating the balls such that one ball attaches to each chip die pad, in combination with the other claim limitations, as recited in independent claims 1, 14 and 24.

Claims 2-13 are dependent upon claim 1, claims 15-23 are dependent upon claim 14 and claims 25-31 are dependent upon claim 24.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The following references are cited as being particularly related to the applicant's invention: Cho (5,985,694), Matsuda et al. (5,937,277) and Matsuda (5,843,798).
